The new year brings a new Boston Museum of Science engineering unit. The design challenge is presented to the students by the characters Jacob and India. While travelling in Thailand, Jacob and India learn that monsoon rains can cause severe flooding that cuts people off from important supplies. Kids will help Jacob and India engineer a series of “aid drop packages” that can be dropped from an aircraft, protect what’s inside, and are easy to find once they reach the ground.

We do our best to get outside daily. Please send winter weather gear with your child. We find when we all get outside we have less wiggly kids and less behavior issues. Thanks!
